

About Our School

My prayer is that this letter describing our school of holistic medicine makes its way into the hearts of those seeking to live their lives with a truly open and sincere heart and with an interest in the field of health as a means to uplift and support others. A key intention of our school is to engender in our students the confidence to educate and empower others “to be their own healer”. It is simply about “doing no harm” in thought, word or practice -- to our bodies, our environment and in our relationships. We will *consciously* study and practice the natural laws of nature.

We use the “ancient healers” (plant medicine), unadulterated botanical formulas for cellular health and enlivenment, undefiled by excipients, chemical pesticides or any other impurities. We offer dietary considerations regarding the nature, chemistry and resonance of the different food groups for our *conscious* use in the physical vehicle.

Unfortunately, the true effective use of earth’s medicines is being replaced by the pharmaceutical industry together with Agri-farming and the chemical industry for profit, not health, with their true motive masked by the wholesale illusion that “their way is the modern way”. However, there is another perspective

The history of allopathic medicine came from great sacrifice, exhaustive research and the alleviation of untold suffering and saving of lives. Many medical doctors today carry the torch of their history with the hope of being freed from the shackles of imposed standards set by the pharmaceutical and insurance industries, etc., to once more allow for the use of true intuition, natural assessments and natural treatments, while recognizing and supporting the wisdom of other modalities. Even today, under certain appropriate acute circumstances, pharmaceuticals may alleviate suffering and save lives. Unfortunately, this is not always the case as far too often patients find themselves dragged down the rabbit hole of excessive pharmaceuticals with little (or wrong) understanding of nutrition. The recent landslide of epidemics in this country is, in part, evidentiary proof of this. Please watch this eye opening 25-minute YouTube video of Dr Zach Bush: **[Chemical Farming and the Loss of Human Health. - link](#)**

The usage of “tools” for assessment (for example **[QRA testing – link](#)**), play a part in providing a definitive awareness of “congestion” (acidic and toxic sites) which lower cellular voltage and interfere with the proper function of organs, glands and systems. Disease is simply congested energy. We do not treat symptoms; we work instead on a cellular level in the form of detoxing, nourishing and enlivening cellular resonance while recovering pH balance essential to our body’s terrain.

This type of training can benefit anyone involved or interested in the healing field. It is not meant as a substitute for the many important ancient and modern therapies such as Chinese, ayurvedic, neuromuscular, chiropractic and the like. Our work here can enhance these modalities, with an inclusive attitude toward the relief of suffering and the upliftment of others.

The “Ancients” speak of the “outer causes” and the “inner causes” of illness as being interrelated; thus connecting the “outer” physical body sciences with the more subtle “invisible forces” as in the science of quantum physics. The journey to radiant health, begins with the understanding of cellular resonance and the realization of the body - mind - spirit connection.

My name is Linda, director and founder of Center of Awakened Health (COAH). I've been in the “healing field” for several decades. This journey has taken me through allopathic medicine as a registered nurse and nurse instructor to “holistic medicine” (a 40-year journey) and has been continuing into the esoteric (inner world) sciences (a soul attraction) that began in 1993. As a researcher of truth, I have been traveling for years to Cyprus to benefit from the teachings of one who has mastered the elements of time and space, a beloved, humble teacher of the esoteric sciences. We have integrated some of these teachings which always point to the true Way of service and love.

The path has now led to this so-called “last service” called Our School, which was born four years ago. Our manual is now finished and presented to those entering the Level II Certification Program.

Esoterically speaking, as our consciousness expands, we become aware of our physical vehicle as a “unified whole” and our perspectives of medicine become simpler and more reasonable. linda

May your life continue to blossom and thrive,
Linda
